Ruby, JavaScript, SQL, HTML, CSS, TypeScript, C#, Python
Ruby on Rails, AWS, GCP, React, Svelte, GIT, Docker, Kubernetes, Linux, Node.js, VSCode, Jira, RSpec, Heroku, Postman, Cypress, Stripe, Sentry, Sidekiq, Unity3d

Experience

Senior Full Stack Software Engineer at **ResortPass**

· Leading the development and architecture design of several new features for our products
· Improving applications by identifying issues, implementing ad-hoc design patterns and improving data models
· Working with product team and internal users
 to identify opportunities and recommend solutions and action items
· Conducting technical interviews for US and Latin American based candidates
· Safeguarding essential best practices by proposing and unifying engineering strategies through meetings, pair-programming sessions and code reviews
· Collaborating on strategies for scaling the engineering team
· Optimizing queries and logic on modules for faster performance of live services and background jobs

August 2020 – Present · 2 yr 1 mos

Senior Full Stack Software Developer at **Great Place To Work®**

· Fully designed and developed a cloud based platform for creating surveys and surveying thousands of users
· Mounted scalable and highly available infrastructure, capable of massive traffic spikes during programmed and simultaneous surveying
· Created an optimized database tool for calculating survey results, capable of clustering with multiple complex parameters
· Designed and developed an API for end-to-end offline surveying, protecting results and user information
· Responsible for supporting and guiding the development team by implementing best practices
· Designed software Architecture for easy interoperability and expansility
· Collaborated on digital transformation initiatives

March 2019 - August 2020 · 1 yr 6 mos

Technical Project Lead at **OutdoorIndex.cl**

OutdoorIndex's founders commissioned me with the development and deployment of a web marketplace application. With the support of a team of designers, we conceptualized the first MVP. After our first iteration, I was not only working as a developer, but as a technical leader, providing technical knowledge and collaborating actively with the business.

October 2017 – Jan 2020 · 2 yr 4 mos

Software Solutions Provider as **Freelancer**

Projects included developing complex web platforms built with Ruby On Rails, solving infrastructure problems in AWS or GCP, building e-commerce sites with Shopify and Spree, creating websites with React or vanilla HTML/CSS, among others.

July 2014 - March 2020 · 4 yr 9 mos

Education

Universidad Técnica Federico Santa María	**Industrial Engineering**	*2009 - 2014*
Pontificia Universidad Católica de Chile	**Agricultural Sciences**	*2007 - 2008*
Fundación Educacional Santiago College	**Industrial Engineering**	*1992 - 2006*
